

IT'S A GO!

The New Road to Patagonia and Harshaw, Thanks to the Meeting of Last Night—Principally Contributions and Energetic Work—The Need of a New Highway to Globe City.

The road meeting called for last night at Levin's Hall did not call out as many of our citizens as the importance of the subject demanded, but the energy and public-spiritedness of the comparatively small number present compensated for the numerical weakness.

The meeting was called to order by Col. Toole, who briefly but pointedly stated the object of the gathering, and he was elected Chairman with Mr. S. R. DeLong as Secretary.

Mr. Hugh Farley being called upon to say a few words on the subject, responded with a five-minute speech, in which he stated in a concise and clear manner the importance of the subject, and urged that Tucson's future lies in her commerce; that that commerce will not come to her doors, let her natural advantages be what they may, unless she offers better advantages to purchasers than her rivals, and that the most important of these advantages are good roads from the different mining districts. He then called attention to the Territorial law in relation to county roads, which provides that upon the petition of ten taxpayers the Board of Supervisors shall appoint viewers to inspect and lay out any proposed road, and the same shall be built if good and valid objections are not offered. The objections to the new road to Patagonia came from interested parties, and were not valid. Because the road benefited Tucson as well as the outlying districts was a reason why it should be built, instead of an objection.

Not a road in the county would have been built had the Supervisors waited until all the inhabitants of the county were equally interested in its building. Hence the Legislature in its wisdom adopted this law that each section in its turn might take advantage of the general aid. The new and growing mining camps should have the quickest and best means of reaching a base of supplies, and because this view of the matter accidentally favored Tucson was no reason why the road should not be constructed. Tucson pays four-fifths of the county taxes and is certainly entitled to some consideration.

Col. Toole then stated that a committee had been appointed at a former meeting to urge upon the Supervisors the necessity of action, and asked for a report.

Mr. Fish as chairman of that committee reported that the Supervisors appointed him and Mr. Samuel Hughes as viewers, to act with the County Surveyor, Mr. Edwards; that he had held himself in readiness since to undertake the work, but was unable to obtain the presence of his colleagues.

Col. Toole then said that talking and waiting would accomplish nothing, and proposed that the citizens build the road themselves. He held himself ready to give \$500 toward the road, and Mayor Leatherwood and Mr. M. Samaniego had signified their willingness to give \$100 each. Who would add to the amount?

R. B. Kelly immediately responded with \$50, which was promptly followed by Messrs. L. Zeckendorf and W. H. as each giving \$500. Messrs. E. N. Fish, C. R. Drake, J. S. Wood, George Cooler and Alex. Levin followed with handsome sums, and the list "cleared up" \$1820.

A motion was made that the money should be offered the county as a loan, to be returned when the funds can be legally raised. This proposition excited much discussion, and to make matters sure, Col. Toole was appointed a committee of one to solicit subscriptions, with two propositions to donors—one giving the money outright to the county, and the other loaning the sum subscribed without interest.

Zeckendorf then offered, instead of his donation, to loan the county \$5000 without interest for the necessary time, and Mr. Williams made a like proposition.

The meeting then adjourned.

The Truth.
In connection with the above, parties interested in seeing the project fall are asserting that the road cannot be built for less than \$50,000. To this we answer that Mr. Samuel Hughes, who is well posted in the matter, offers to give bonds that he will construct a first-class road through the Santa Rita mountains at the proposed point for \$6,000; and he furthermore asserts that he can make money on the job.

The remarks of Mr. Farley on the subject of a road to Globe, to the effect that one could be built for a comparatively small amount that would secure the trade of that important district, should receive careful attention and immediate action.

Parties attending the sale of lots at Benson on Monday by the excursion train will want a good hotel to go to. Don't forget Logan's Branch Hotel is the "best," and the proprietor is making every preparation to secure the comfort of his guests on that day as on every other occasion.

SOMETHING NEW.—A half boot, just the thing for the Territory; a boot and shoe combined; made of the best calf, round or square toed. Ten dozen just received at the new Boot and Shoe House, corner of Main and Pennington streets.

MAYOR LEATHERWOOD will give the word "go" at the walking match to-night.

A Touching Tale.

A moving incident of the heat occurred in front of the Fontaine saloon, and we record it for the benefit of our Eastern exchanges, who assiduously hunt our local papers for "heat" items to publish in the intervals occurring between their cyclones, snow storms, sunstrokes, and other little pleasantries which distinguish the delicious Eastern summers.

Two very fat men were in the progress of a heated discussion. That is the characteristic of all fat men's discussions when the thermometer is gambling at 112 degrees in the shade. The subject was the 72-hour walking match, and each told marvelous tales of his early feats in the goat-you-pulse line. Finally one challenged the other to a race to the upper side of the plaza for the drinks "all round."

The alarmed bystanders had just begun to get into a cold perspiration, when a young man with a callioped nose and "dizzy" hat, in the full glare of our modern civilization suggested that the contestants walk up to the other side of the plaza and melt down, adding, with a diabolical grin, that one heat would be sufficient.

Of course the fat men were entitled to the choice trophies of the melted corpse, and as one of them was helping three or four of the bystanders to lift the right ear and a portion of the nose of the unhappy young man into an express wagon, he remarked that he didn't care a Tucson prayer if the victim was the sole prop and stay of a downtown billiard table; he "wasn't going to tow them California sharpies to get too fresh at his expense."

BULLION BARS.
Short Glimpse of the Stream as it Flows by.

Thursday, June 12.—Contention, 3 bars, \$6,400.88; Tomlinstone, 3 bars, \$5,088.69.

Silver King shipped 14,000 pounds of concentrations to San Francisco on the 13th.

The finest bullion bar ever shipped was No. 227 of the Tombstone Mill and Mining Company's "silver series." It was shipped on the 13th, and was worth \$218.21. It had a very comfortable traveling companion in No. 236, shipped the same day, and worth \$279.17.

Monday's CITIZEN gave the figures of the total Contention shipments as \$213,553.23. It should have read \$213,583.23. It was a mistake of only a cool hundred thousand.

The track which will soon be deeded with the sweatdrops of six 72-hour lap-spinners is temporarily wet down with the less glorious moisture that is extracted from the whirling, seething acquia with a 40-cent tin sprinkler. Already the contestants begin to leer at each other, and with mysterious whiffs give the bystanders an idea of what they themselves will accomplish when they get on their particular color and put on steam.

The track has been finished according to the latest edict of pedestrian authority, and a measurement by Civil Engineer H. B. Maxton gives 24 laps to the mile. The trouble will commence at 9 o'clock to-morrow night.

"All set" is the order of the day at the Summer Theatre, in Levin's Park, where each of the five aspiring lap-runners will be set in motion to-night at 9 o'clock—and not at 9 a. m. to-morrow, as our morning contemporaries erroneously had it. The track is in fine condition, the men are dingo, the public is beginning to feel the full symptoms of the pedestrian tidal wave that has deluged the East, and Manager Blackburn is happy. He has worked hard to give the thing a good start, and we believe the success will exceed his most sanguine expectations.

SEÑOR FLORENCIA ROSA, a government surveyor in Sonora, arrived in Tucson yesterday direct from Hermosillo. He reports the country and people quiet and the Marquez trouble under control. He comes here to trace the boundary line east of San Pedro in the interest of the Canon Bros., who own land on both sides. He is, without doubt, a competent surveyor, and his work will be of value to the public in Arizona. He will receive courteous treatment from our citizens, as all do who come on peaceful missions.

R. J. BERRY has arrived in town and brings a veritable novelty in the shape of a genuine Edison phonograph, with a complete apparatus for its proper working. It will probably be on exhibition in our city in a day or so, and will doubtless talk and sing to large audiences, as it is the first ever brought to the Territory.

The excursion train to Benson will start at 7 o'clock on Monday morning, and as the fare is only \$2, a large trainload of people will probably go out, if for nothing else than to see the count.

The tickets are now on sale and are limited in number, and those who wish to take advantage of the cheap trip will have to apply early.

"Baldwin Ranch" Butter.
C. Seligman & Co., are in receipt of this celebrated brand of butter, which comes only in 4½ pound square blocks, and is unquestionably the best and freshest butter ever brought to Tucson. Try it once and you will have no other.

CHAS. R. DRAKE, of the postoffice, takes Claude Anderson's place in the United States Depository, during the two months the latter will be absent at Santa Monica. Mr. Anderson left on Friday night, and we hope he will return with his health perfectly restored.

The cooling train comes not a moment too soon.

Once More to the Breach.

The Morning Record, which suspended publication on Thursday last, will appear again on Tuesday morning next under the management of Mr. M. D. Anderson, the well-known lawyer of the firm of Nussage & Anderson. It will be Democratic in politics, as heretofore, and we shall give its appearance a warm welcome. While we regret sincerely that Messrs. Thomas and Woods have severed their connection, we are glad that the paper has fallen into so good hands. Mr. Anderson is a gentleman of sterling abilities, and although he is on the wrong side of the political fence, he is there honestly, for he is a life-long Democrat, and has never attempted to do any party straddling.

Church Chimes.
PRESBYTERIAN.—Service in the Presbyterian Church to-morrow morning, beginning at 11 o'clock. Key: W. H. Dean.

METHODIST EPISCOPAL.—Service will be held in the evening, in the Presbyterian Church, beginning at 8 o'clock, conducted by Rev. Wm. G. Mills, the pastor. Sunday school at 9:30 in the morning.

Two drunken Mexicans on Congress street abused and insulted passers by for some time to-day, and one of them was finally picked up in the street with an ugly gash in the back of his head and his mouth looking much as though he had been fooling around a 40-stamp mill. He was taken care of and his companion arrested.

The Ivy Social Club will hold a meeting at Levin's Hall to-night at 8:30, for the purpose of completing the arrangements for their social on Friday evening next. The social is to be an invitation affair, and will prove the most enjoyable one of the kind ever held in Tucson. It is in the best possible hands.

The first fears of the season made their appearance at Pierce's Cash Store this morning, and if anybody wants any of them they will have to start on an amateur walking match, as they are disappearing like the beautiful snow.

Low-cut shoes for men ladies and children's fine goods at living prices, at the new Boot and Shoe House on the corner of Main and Pennington street.

A BEAUTIFUL three-stone diamond ring, a perfect gem of an ornament, worth \$110; price \$63, at Uncle Harris', 221 Kearney Street, between Bush and Sutter.

A CLERK of Stinson & Wallace had his shoulder dislocated at Pantano yesterday. Dr. Turner was sent for, and the injured man is doing well.

A GONGBOOS now wire railing on the counter at the depot now confronts the public with its stern official presence.

THE freshest, coolest, most tempting Los Angeles beer always on draught at the Germania Hall on Meyers street.

CARLOS JULIA, waiting on Church Plaza, is assuming imposing proportions, and will be a decided ornament to the city.

THIS warm weather is making good times for the agents of refrigerators. Schumann & Co. today sold two more of these celebrated "Palace" coolers.

FOR SALE.—First-class billiard table, with all usual appointments, including cues, rack, balls, pool-board and pins, etc., all in good order, for \$250. Also, good cooking-range. Apply to J. H. Church, Tontine Saloon (formerly European), corner Church Plaza and Camp street.

THE finest stock of boots ever brought to the Territory can now be seen at the new Boot and Shoe House, corner of Main and Pennington streets, at prices that defy competition.

IMPORTED limes, enormous oranges, mammoth onions, the best fruit and the freshest groceries make the stock at Felix's fruit store, on Mealla street, the best in the city.

FIXE CLOCKS at the Gem.
SETH THOMAS clocks at Nelson's jewelry store, next door Western Union Telegraph office.

WATCHES repaired and warranted at Nelson's, next door to Western Union Telegraph office.

SMOKE the Punch Cigar, at F. A. Earl & Co's.

SILVER FOR GREENBACKS.—Two thousand in greenbacks for silver, highest premium, paid at D. Velasco's.

Just received at H. Dachs's—Choice Liquors and Wines, which will be sold cheap. The public is invited to sample my stock.

EXPOSED PICTURES at Plummer's.
FRESH Pine Apple Sherbets and Ice Cream, at Charles Schurz's.

SEWING-MACHINES to rent at Dotz's.
SEWING-MACHINES at Plummer's.

At I. Norton's Loan and Brokers' Office the highest premium will be paid for Currency or U. S. Gold, Congress street, opposite Safford, Hudson & Co., Bankers.

\$100 saved is \$100 made. Change your Gold or Currency into Mexican Silver, it will reach just as far as Norton's Loan and Brokers' Office, Congress street, opposite Safford, Hudson & Co's.

Well-regulated Clocks cheap at Berger's.
PLANOS and Brass Instruments at Berger's.

SMOKE the Garcia fine Havana Cigar, at Earl & Co's.
PIZZA and Tobacco at Plummer's.

WANTED.—\$20,000 in U. S. Gold or Currency, for which the highest premium will be paid at Norton's Loan and Brokers' Office, Congress street, opposite Safford, Hudson & Co's.

Who is to Blame?

The manner in which a portion of the census in this city is being taken is exciting universal surprise and indignation. No one seems to have a general charge of the matter. The regularly appointed Supervising Enumerator, W. H. Seaman, is off on a two weeks junketing tour in the Santa Catalinas, apparently calmly indifferent as to "whether school keeps or not." The work in the northern half of the city, under the charge of S. A. Manlove, is very thoroughly and well conducted, Mr. Manlove having a correct and intelligent idea of the duties of his appointment; but the canvass of the southern portion, in charge of Officer Sheppard, is in a ridiculously undressed shape, and if it is not all done over again, will represent about a fourth of the real population. The fault seems to be not so much with Mr. Sheppard as with his appointment. We understand that he was prevailed upon to accept the work much against his inclination, and as a police officer, he should not have been appointed at all. Instances are too numerous of a complete oversight of whole families, while in other cases no one but the heads of families have been recorded. A meeting of citizens will probably be called to consider the matter, when some facts will be elicited which will end in a change of officers.

The Most Delicate of Questions.
Mrs. M. Frua, residing on Convent street, was yesterday afternoon arrested upon the sworn complaint of Census Enumerator Sheppard for a refusal on her part to answer the pointed question of "what was her age."

Sheppard refused to judge for himself, and had her produced before Judge Neugass, in his capacity as a United States Commissioner, who on a promise on her part to render proper answers to the questions to be asked by the census-taker and on payment of \$1 costs, discharged her from custody.

This is the first arrest in the city for such an offence, and we presume it will be the last. It seems to have been rather hasty, and as Mrs. Frua is only temporarily stopping with a friend in the city—awaiting the return of her husband from Sonora—we think that it would have been wiser for Officer Sheppard not to have proceeded to extremes, but secured his object by a little flattery or persistent urging. Let others, however, take warning in time, as the orders are peremptory from Washington to arrest in every case of refusal to give proper and correct answers to the question propounded.

A Surprise.
We knew that the lumber business of Tucson was assuming great proportions, but had no real idea of its true extent until we visited the yard of the Arizona and California Lumber Company, at the corner of Camp street and Military Plaza. Mr. Mason, the efficient manager, gave us a most polite reception and kindly showed us through the yard and sheds, which are piled high with the most complete assortment of the raw material as well as manufactured articles used by builders. Not only is the list complete, but the stock is simple enormous, and the largest kind of an order would fall far short of swamping the resources of the company, who have the very best of Californian connections. The stock comprises doors, window frames, sashes with and without glass, mouldings, and a thousand and one other things necessary in the trade.

J. C. WATERMAN, one of Arivaca's prominent mining operators, leaves for a visit to his family at Colte at the beginning of next week. He will return about the 1st of August, when he will inaugurate vigorous work on some of his mining claims. He has considerable property in Arivaca, and gives it as a result of much observation that that district and Oro Blanco have wonderful futures before them. He also has, in connection with Messrs. A. A. and N. Schuster, a ranch of 2500 acres on the San Pedro, just above old Fort Grant, called the Spring Valley, on which the proprietors now have about 600 head of cattle and will shortly increase the number to 1000. The ranch is beautifully situated and is said to be one of the loveliest spots in the Territory.

THERE is something uncanny about the mysterious sausage, and we never tire of warning our truly good readers against their malign influence. Only last night, one of these diabolical inventions reduced some railroad boys on a spree to steal it, and the consequences included a conglomerated fight, arrests, fines, flight, and all the train of attendant evils that hover invisibly around these harmfuls.

Vick's Magazine recommends coffee-grounds as a manure. A lady of San Francisco lately received some plants from Mexico and with the plants came advice to fertilize them with waste coffee and coffee-grounds. This was done, and the results were so satisfactory that the same treatment was tried on roses, and the effect was a healthy and vigorous growth, and more and better flowers, and of richer growth.

GEO. CLINTON B. FINE'S investments in Globe, Arizona, has been a good deal to that district, although the General is too religious a man to endorse that expression. He started a perfect stream of capital Globeward, and has been the means of stimulating great activity there. His son Charles has become a resident of Globe, having established a banking house there.—[N. Y. Daily Mining News.]

In a special from Florence, published in yesterday's CITIZEN, the misplacement of a comma and the word "and" made it appear that "Silver King" had shipped over \$3,000,000 this month, and will clear up \$100,000 more." Note the difference: "Silver King" has shipped over \$3,000,000, and this month will clear up \$100,000 more.

Wasn't it Suicide?

A man named Joseph Montgomery left here yesterday to walk to Casa Grande, in company with a man whose name we did not learn. When they had proceeded about twelve miles on their way, Montgomery complained to his companion that he was unwell, and stated that he had a bottle of strychnine in his pocket, and must have taken some of it with his tobacco. His companion then hurried on to the station, four miles further, and informed the section foreman of Montgomery's condition, and a hand-car was at once dispatched to the spot with some men, who brought the dying man to the station, where he died in terrible agony at ten o'clock last night. His body was sent to Tucson on the night train, and an inquest was held to-day, the jury returning a verdict that the deceased came to his death from accidental poisoning.

Montgomery is a man a trifle above medium height; has black, curly hair touched with gray; wore a black hat, dark brown coat and light clothes. In his pocket-book were found bills and letters of Barnett & Block, showing that he has been in their employ at Casa Grande, and a bottle of strychnine. In the book was the following, written with a lead pencil and without a date:

"Good-bye to all friends; I can't stand it any longer."
JOSEPH MONTGOMERY.

The presence of the poison and the inscription in the book, would seem to indicate that the deceased at some time in the past contemplated suicide, but the jury evidently had reason to think he had no such intention, hence their verdict.

The Sawdust Arena.
Since it has become apparent that the walking-match is to be a bona fide test of pedestrian endurance, the interest has gradually increased until it bids fair to become the all-absorbing topic on the street.

Five entries have thus far been made, the favorite among the knowing ones being a young Englishman named Dunning, 25 years of age, who is believed to have the necessary speed and staying power to walk away with the cake.

William Connolly, aged 26 and a native of San Francisco, has also some strong backers from the fact that he had some little experience and won a 100-mile match in Oakland before coming here.

The other three entries are John Kennedy, aged 41, a native of Ireland; Joseph Blinckorn, aged 24, a native of New York, with a good record in a 50-mile match; and John James Corneily, aged 24, and also a native of New York.

Tuesday, Wm. Emsbury added his name and feet to the list of votaries at the shrine of pedestrian ambition, and among the insiders he is regarded as the dark horse. He is from California and is 35 years of age.

Farwell.
Mr. and Mrs. A. E. Fenton and daughter left for their home in Fairview, Ohio, Monday night. Mr. Fenton is President of the well-known Esperanza mine in Pima District, and has been here for some time for the purpose of inspecting the property. He returns home well pleased with the outlook of the mine, as he has every reason to be. We give him a regretful good-bye, and have a hearty welcome for him whenever he may return. Ohio cannot send us any too many of her citizens of Mr. Fenton's stamp.

We were to-day shown some beautiful Mexican gold filigree work manufactured in Mr. J. M. Berger's establishment on Congress street, which for elegance of design and superior workmanship has no rival in the way of ornaments. Mr. Berger to-day sold a couple of diamonds, watches and all kinds of jewelry in an ornament to the city, and is well worth a visit.

E. B. WAKEFIELD, the efficient Superintendent of the Esperanza, is in town on a visit. We learn that Mr. Wakefield contemplates an early return to his home in the States, and the regret that his many Arizona friends will feel at the news will be tempered by the hope he will change his mind and remain.

CAPTAIN MADDEN, one of this district's most gallant officers, is in town from Fort Bowie. He says Gen. Hatch is badly handicapped in his race with Victorio, and modestly refuses to accept so much credit. But he and his Arizona colleagues made Victorio hunt another boarding-house, all the same.

SAYS THE MINER: From the tenor of Mr. C. C. Bean's telegram, it is quite evident that the directors of the St. Louis and San Francisco 33rd parallel route mean business, and that which will certainly give to Northern Arizona an outlet by the construction of an iron thoroughfare.

MR. THOMAS GARDNER is back in town from Tombstone, where he has been very successful in working up his new publication, the Arizona Illustrated News, which is intended to be a complete exposition of the best features of the Territory, pictorial and otherwise.

THE Cosmopolitan bath rooms are now open to the public, and are, we believe, the first erected in the city supplied with all the latest conveniences of showers, hot and cold, etc., besides being large and well furnished.

WELLS, FARGO & Co. have had an office at Harshaw for over two weeks. W. H. Wells is the agent. This will prove a great convenience to the public, as Harshaw is a "coming camp."

GLOBULES

Of News from Pinal County—A "Chrono" That Can't Be "Hung Up"—Globe's Future—Suicide—Mysterious Disappearance.

GLOBE, June 11.

EDITOR CITIZEN: The business activity here continues, with a daily increase in every line. Town property is in great demand, while improvement is the order of the day. Houses are springing up like magic on every side. The new church will in a few days be completed, which will add greatly to the appearance of the upper portion of town. Every day brings new people, some of whom are seeking investment for capital, while others come in search of home and employment. The weather has been quite warm for several days past, the thermometer reaching as high as 104 degrees in the shade; but notwithstanding the heat in the day, the nights are pleasant, and a blanket or two are necessary to comfort before day dawns.

The general health of the people could not be better, while work on the mines in all directions is being pushed vigorously with results, satisfactory to the most sanguine.

We visited the Chromo mine a few days since, where we found Messrs. Moore and Trout busy at work developing their valuable property. A few more such men at work on other claims that are located in the immediate vicinity of the Chromo would make this one of the most productive and prosperous mining camps in Globe District. The developments on the Chromo consist of several inclines and shafts of various depths, from 10 to 30 feet, out of which has been taken a large amount of good ore, and leaving large quantities of high-grade ore exposed to view, while in the tunnel, which is 484 feet long, we are told that there is a large body of low-grade ore that will pay handsomely when they get machinery for reducing it on the ground. We did not examine this tunnel from the fact that we were unwell, and did not care to get our feet wet, there being considerable water to be encountered. This property, besides showing a well-defined vein in the tunnel, about 40 feet wide, has a flat vein from 18 inches to 4 feet thick that appears to cover the greater portion of the claim, and is found at a depth of from 5 to 10 feet from the surface by sinking a shaft on any part of the ground, and when struck usually shows good ore. The formation is granite, and in fact all indications point to permanency. We congratulate the fortunate owners of the Chromo as having a first-class property, one that in due time will command the attention of capitalists.

The Lazy Bob mine, near the above described property, has been sold by Mr. Daniel Boardley, to M. J. L. Clark, of McMillen, but we are not informed as to the price paid.

The Dragon mill has changed management and will also change the method of reducing ores. The Baldwin mill is running, we are told, on gold ore; the Isabella is to follow suit in a few days, while the work on the Irene, Nugget and Golden Eagle mills is being pushed with all possible haste. Before the wane of many months the cheerful music of their falling stamps will be added to those already in operation, when the gold and silver bullion will be continuous and will speak plainly as to the value and merits of our mines.

There is not the slightest doubt as to the future of Globe city as being a great business center, surrounded as it is by rich mineral deposits, the extent of which is boundless; and besides this, there are large bodies of agricultural and grazing lands on Salt River, Cherry and Tonto creeks that are being rapidly settled up by intelligent and industrious people who are compelled, in a measure, to make Globe their source of supplies, which will necessarily add greatly to the business interests of the place. All in all, indeed, the outlook for no other place west of the Rocky mountains can be more prosperous than it is for Globe at the present time.

On the 5th instant a man by the name of Daniel Wright committed suicide near here by cutting his throat; cause, excessive drink. And about the same time D. P. Carr disappeared very mysteriously, and although a diligent search has been made, there is as yet no clue as to his whereabouts. His blankets and things were left behind, which makes us fear that there has been foul play. He was last seen in Globe City. His cabin is near Ramboz Camp, where his things were left.

DEPORTED.
Joseph Blackwood, an employee of the railroad, and a carpenter by trade, evidently thought something was lacking in this life, and he accordingly went to the vicinity of Warner's mill Tuesday afternoon and shot himself twice in the head, one bullet entering his forehead and the other the back part of his skull. He was brought to town and his wounds were properly attended to, after which he was taken to the Sisters' Hospital. So far as we can learn he has not yet stated any cause for his rash action, and as he is perfectly sane, it seems hard to assign a reason. He has been a resident of the city for a short time only.

A morning contemporary stated that he was not likely to live, but this is a mistake. We are told that he sat up this morning and partook of a hearty breakfast, and expressed an earnest desire to get well.

Part of the new custom mill which is to be put up at Dos Cabezas, arrived and went forward yesterday.

The Public Land Mining Bill.

The bill reported from the House Committee on Mines and Mining yesterday, to provide for the survey and disposal of mineral lands, is the bill on that subject which was framed and sent to Congress by the Public Land Commission, amended in only a few particulars of no importance. Mr. Stevenson was authorized to report it by a mere majority of the committee today, and its being placed upon the calendar is considered by the Pacific Coast Representatives to amount to nothing. The short bill agreed upon by them at the meeting at Senator Jones' residence, and reported from the same committee nearly two months ago, has precedence on the calendar, and will be passed, if any action at all be taken by this Congress concerning mineral lands, long before the Public Land Commission measure can be reached, and it is conceded by the friends of the latter that the passage of the former will kill their measure. The short measure above referred to has been agreed upon by all the Representatives of the mining States and Territories, including the Republic of Colorado. It prescribes a general system of square locations, with the very important exception of all lands which have a dip of more than twenty-five degrees from the horizon, and also allows and protects "prospecting claims" (namely, where there are no surface indications) by giving citizens the right to hold a claim ledge by doing \$300 worth of work upon it per annum.

Outside of her political work this summer Kentucky means to turn out ten million gallons of whiskey and a dozen big horse-races.

Good times counting—300 men wanted at once to buy California hand-made boots and shoes at lowest prices, at the only exclusive boot and shoe house in the Territory, corner of Main and Pennington street.

The heat yesterday was fearful, but nothing in comparison to the rush at Warren's.

Prisons and Organs sold on instalments at Berger's.

ATTENTION smokers! A fine lot of imported Havana cigars at the Pioneer News Depot.

P. F. NELSON Jeweler, has removed to Congress Street, next door to Western Union Telegraph office.

Good goods at low prices at Plummer's.

Gold, silver and nickel watches at Nelson's jewelry store, next door to Western Union Telegraph office.

Horse painting by O'Leary.

SPECTACLES and Eye-glasses at Nelson's jewelry store, next door to Western Union Telegraph office.

A Card.
To all who are suffering from the errors and indiscretions of youth, nervous weakness, early decay, loss of manhood, etc., I will send a recipe free of charge. This great remedy was discovered by a missionary in South America, and a self-addressed envelope to the Rev. Joseph T. Luman, Station D, New York City.

SELBY SMELTING AND LEAD CO.
410 Montgomery Street, SAN FRANCISCO.

Gold and Silver Refinery, and Assay Office.

HIGHEST PRICES PAID FOR GOLD, SILVER AND LEAD ORES AND SULPHURETS.

Manufacturers of Bluestone.

Lead Pipe, Sheet Lead, Shot, Etc.
This Company has the best facilities
